

Timber Bridge

Manufacturers Information | A-NAT-2214

Material Specifications

Bridge Ironbark Timber, Spotted Gum, Galvanised Posts
Fixings and footings Stainless Steel

Equipment Specifications

Free Height of Fall Not required
Fall Zone Size Not required
Activity Space Recomm. Allow 1m around equipment
Highest Point 806mm

Standards

AS 4685 2021 Series

Applications

Age Group All ages
Supervision Level Young children should be supervised and inappropriate activities discouraged
Playspaces Public parks, schools, early childhood centres commercial play areas
Environment Shade preferred for user comfort and protection.
Vandalism Resistance Low susceptibility

Please note

Our Natura Play Elements ranges are made as original pieces, not mass-produced. The character of each piece will be affected by the individual timber available at the time of production. The above image should be used as a guide only.

Whilst care is taken to select the best materials, timber is a natural material that is expected to seasonally expand and contract over time and when subjected to temperature extremes. We use Ironbark and Cypress timber in our designs, Cypress timber in particular is prone to fine checking and knots are very common. Accordingly, timbers supplied may have checks and knots that are not structurally compromising.
